YOUR LIGHTING

OUR PASSION

RICOMAN Lighting is a leading commercial and industrial lighting manufacturer based in Manchester, UK. With over 20 years of experience in lighting design and manufacturing, RICOMAN offers a wide range of high-quality lighting solutions for many different applications. Our commitment to innovation and sustainability has enabled us to become a trusted lighting brand in the UK, known for our excellent customer care, industry-leading supply times, and bespoke project solutions. We work closely with M&E consultants, architects, builders, contractors, and electrical wholesalers to deliver projects on specification, on budget, and on time.

WHY RICOMAN

10 Years UK Manufacture of Lighting

On Time.

Our extensive stockholdings ensure industry-leading delivery times. By collaborating with European-based component suppliers, we achieve rapid production turnaround. We are committed to fulfilling our promise of delivering your order on time.

On Budget.

We have meticulously curated our product portfolio to cater to various budget requirements. We are confident that our prices are competitive with those of reputable lighting companies, ensuring that we stay within your budget while maintaining our commitment to quality.

On Specification.

Our product development team create high-performance lighting products that boast excellent performance and class leading technology. We can also make swift and efficient customisations in order to create products that are truly specification-compliant.

Community

p.10

At RICOMAN, we foster a strong sense of community by creating exceptional lighting environments that enhance the spaces we live and work in. We actively engage with our team, partners, and customers, creating a supportive and collaborative environment that drives mutual growth and success. Together, we illuminate a brighter future.

Curiosity

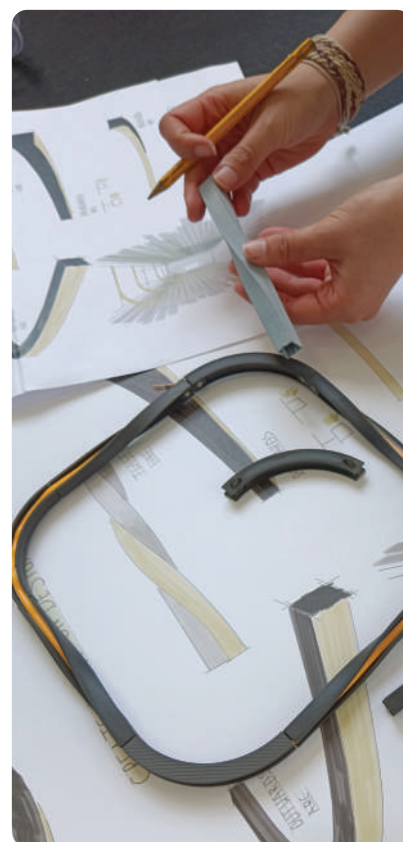

p.20

Curiosity drives us forward at RICOMAN, and we invite you to explore our interactive website, where you can discover our extensive product range and learn more about the cutting-edge technologies that power our lighting solutions. Dive into our comprehensive catalogue and let your curiosity lead the way.

Growth

p.24

RICOMAN is dedicated to the growth of the UK production and manufacturing industry. Our state-of-the-art facilities and committed team contribute to expanding local manufacturing capabilities. We prioritize sustainability through initiatives like LightRevive and an eco-friendly approach, ensuring that our growth aligns with environmental responsibility.

INDEX

"The best view comes after the hardest climb. And the best success comes after the hardest **teamwork.**"

On a team-building day, we conquered the challenge of climbing Mount Snowdon. It was a test of physical endurance and mental resilience. But through teamwork, determination, and support for one another, we reached the summit.

The inclement weather failed to dampen our spirits as we faced the daunting task of ascending Mount Snowdon. This unforgettable adventure serves as a testament to our ability to overcome obstacles and achieve success when we stand together.

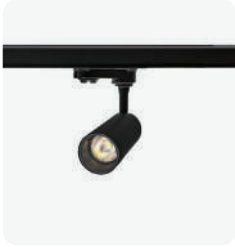

WORKSPACE LIGHTING

Studio Power Architect Office, Manchester

RICOMAN proudly partnered with Aberla Group to successfully complete a remarkable lighting project for the Crescent SP HQ, an architect office. Through meticulous collaboration, we transformed this building into a cutting-edge workspace, adorned with a stunning lighting collection designed by Ricoman.

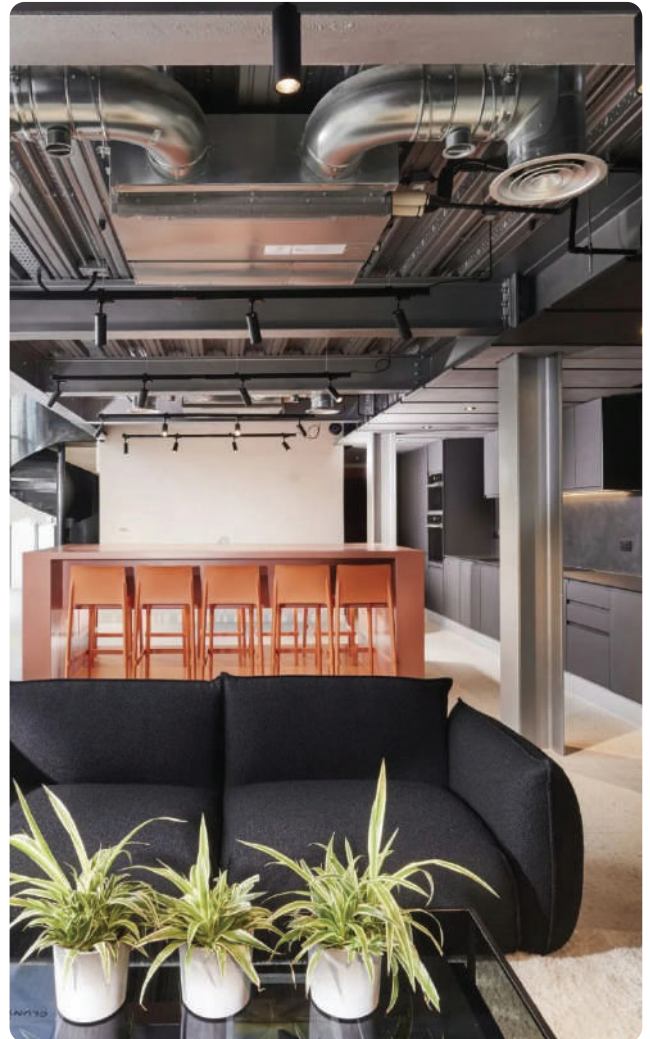

Our innovative lighting solutions not only enhance the aesthetics but also create a functional and inspiring environment for the architect office. This project exemplifies our commitment to delivering lighting solutions that meet the unique needs of our clients, while showcasing our expertise in architectural lighting design.

We utilized the Pulsar adjustable spotlight in both track-mounted and surface-mounted versions. With its versatile beam angle adjustment, the Pulsar spotlight proved ideal for various applications and areas within the building. Its adaptability and high-performance features ensured optimal illumination, enhancing the ambiance and functionality of each space.

Pulsar Track

A modern angle and rotation adjustable track light.

COMMUNITY

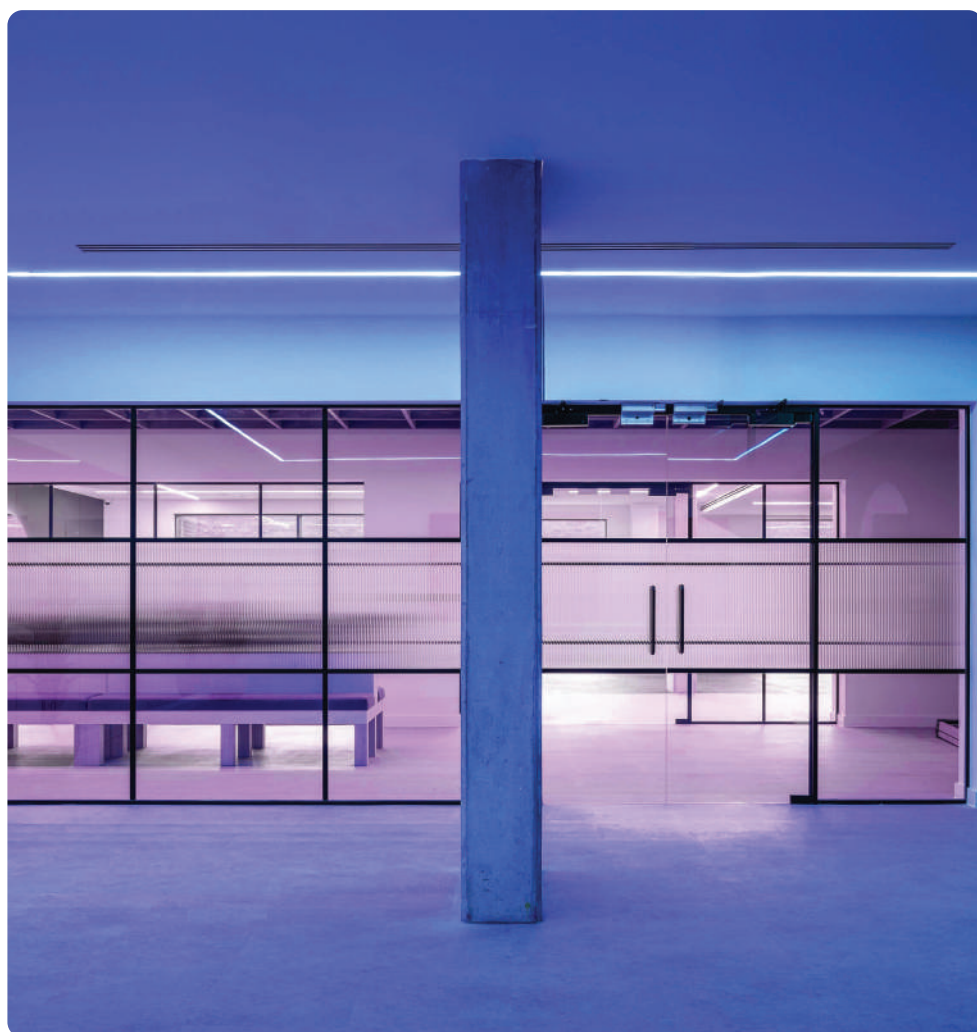

HOSPITALITY LIGHTING

Yoga Studio at FiftyFive Queen Street , Salford

Estrella Pro RGBW Recessed

The colour changing version of our architectural surface mounted or suspended linear lighting solution.

RICOMAN illuminated the modern Fifty5ive Queen Street building in Salford, Manchester, including the stunning yoga studio. Our choice for this project was the Estrella Pro recessed linear lighting in RGB, delivering vibrant and customizable lighting effects to enhance the space's ambiance and create a captivating atmosphere.

COMMUNITY

RESIDENTIAL LIGHTING

Local Blackfriars, Salford

RICOMAN took on the challenge of providing comprehensive lighting solutions for the residential areas of the development, consisting of 380 apartments, townhouses, and penthouses. Additionally, we were responsible for illuminating various other areas of the buildings, such as communal spaces, a state-of-the-art gymnasium, cycle

store, reception areas, carpark, mechanical/electrical riser, commercial offices, tank room, bin store, and ensuring proper emergency lighting throughout the premises. Our goal was to create a well-lit, safe, and inviting environment for residents and visitors alike.

The project outcome is outstanding, with our luminaires seamlessly blending with the building's design aesthetic. Optimal light levels and architectural style create a visually stunning space that combines functionality and elegance. We take pride in enhancing the overall ambiance, elevating the building's design to new heights.

R3 Downlight

The epitome of an all-in one downlight: tunable white or fixed Kelvin, dimmable, IP65, fire rated with 4 interchangeable bezels

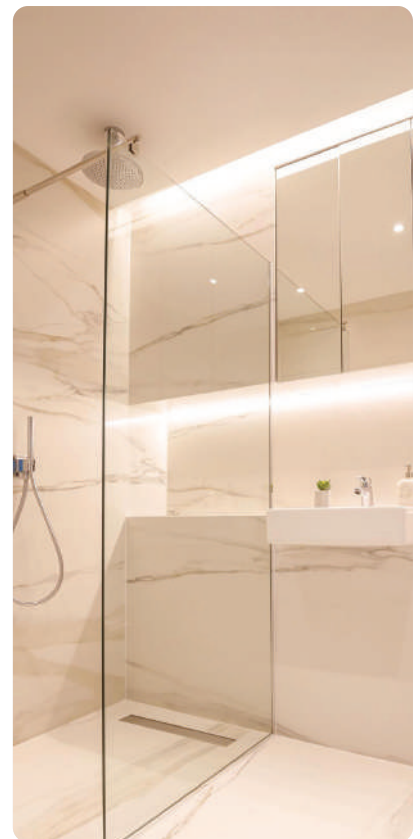

Alphard

Surface mounted architectural halo bulkhead.

Aeroline

Ideal for under cabinet kitchen lighting, retail, display or refrigeration lighting.

MANUFACTURING IN THE UK

Over 50% of our products are made in the UK.

At RICOMAN, we strongly believe in the importance of investing in UK lighting manufacturing. It is a fundamental aspect of our business and the industry as a whole. By investing in our manufacturing facilities, supply chain, and partners, we are able to produce high-quality lighting products efficiently and effectively. This allows us to meet the ever-growing demands of our customers and ensure their satisfaction.

But our investment doesn't stop there. We also prioritize the development of our team. Through ongoing training and development programs, we keep our team members up to date with the latest advancements in lighting technology. This enables us to stay ahead of the competition and maintain our position as industry leaders. With a team of skilled lighting designers and project managers, we offer comprehensive services including CAD design, 3D renders, fully compliant lighting designs, and expert technical and design advice.

SUSTAINABILITY

We are committed to reducing our environmental impact.

We are committed to sustainability and have implemented a range of initiatives to reduce our environmental impact and help us create a more sustainable future.

These initiatives include switching to an electric car fleet to reduce our reliance on fossil fuels, and eliminating plastics from packaging where possible to reduce our use of non-renewable resources, recycling packaging with a cardboard shredder for order packaging to divert waste from landfills.

We aim to grow our UK production and a Europe-based supply chain to reduce our carbon emissions from transportation, design and manufacture products using circular economy principles to extend the life of our products and reduce waste, and re-manufacturing and recycling existing luminaires through our LightRevive program to extend the life of our products and reduce waste.

LightRevive

We believe that every lighting fixture deserves a second chance.

At RICOMAN, we are committed to sustainability and believe in giving every lighting fixture a second chance. Our mission is to provide eco-friendly solutions by re-manufacturing and re-purposing old fixtures, reducing waste and our carbon footprint. With a team of experienced professionals dedicated to finding the best lighting solutions for your needs, we deliver high-quality fixtures and prioritize excellent customer service.

As part of our sustainability commitment, RICOMAN actively embraces a circular economy approach. We consider the entire lifecycle of our luminaires, from production to end-of-life, striving to minimize waste, extend product lifespans, and promote resource efficiency. Through the use of recyclable materials and modular designs that enable easy repair and component replacement, we aim to transform luminaires into new products at the end of their lifecycle.

By embracing the circular economy, we not only reduce the environmental impact of our products but also contribute to a more sustainable and resilient lighting industry. Together, let's build a brighter future through responsible and circular lighting solutions.
